

Fig. 1

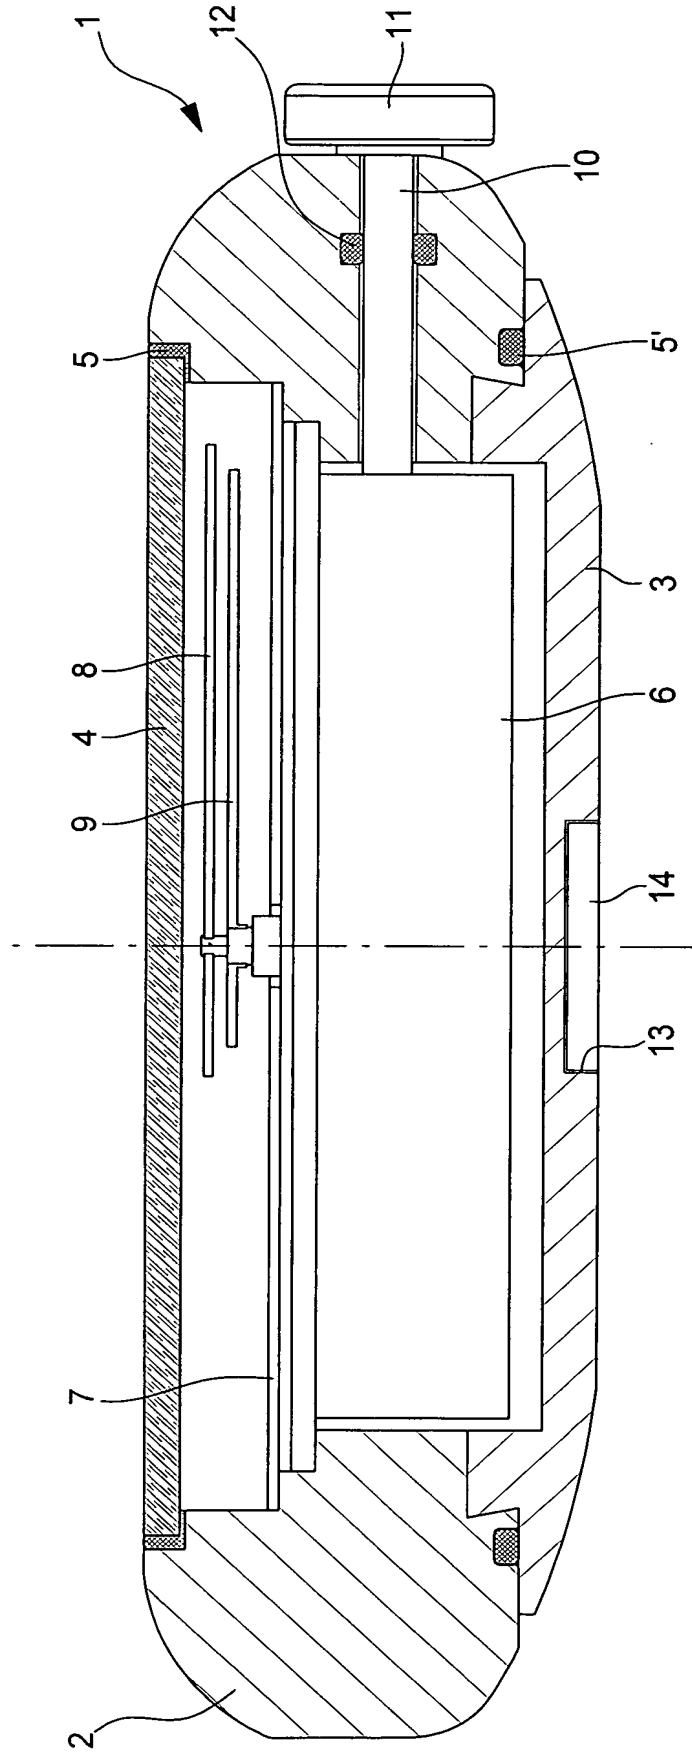

Fig.2

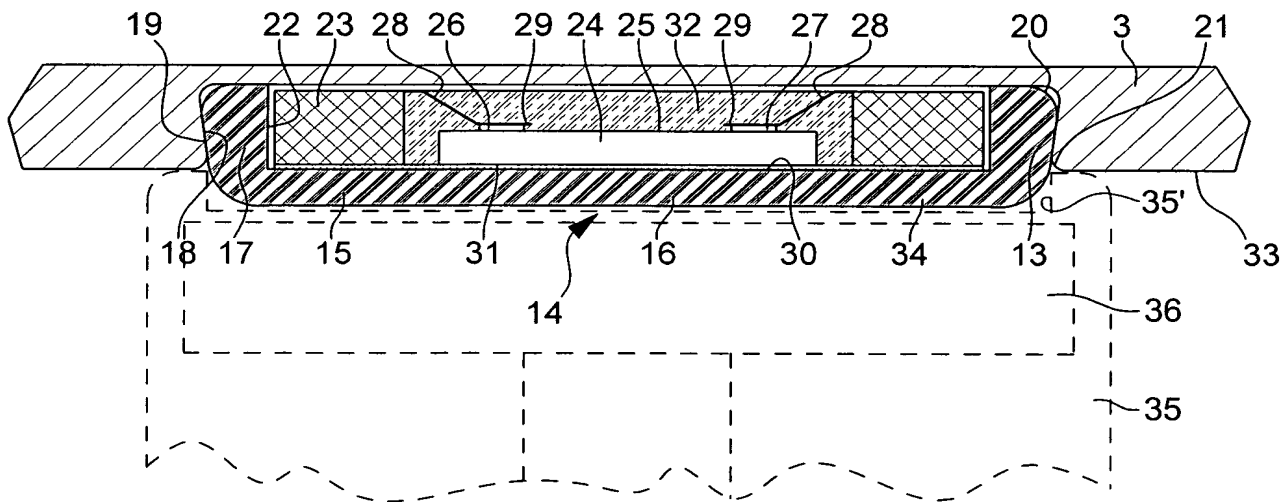

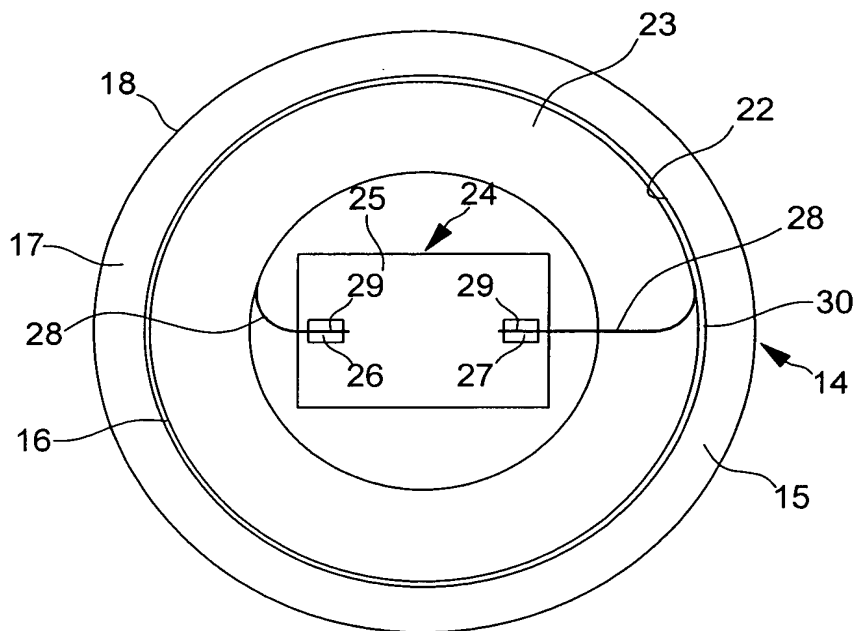

Fig.3

This diagram shows a top view of a circular device. It features several concentric rings: an outermost ring (15), a middle ring (16), and an inner ring (17). A central rectangular component (25) is positioned in the center. This component has two small rectangular features (26 and 27) on its left and right sides, respectively. Two circular features (28) are located on the left and right sides of the central component. Arrows (38 and 39) point towards the central component. Other labels include 18, 22, 23, 24, 29, 30, 40, and 41, which point to various parts of the device's structure and components.
